ance Notes on Codes and Abbreviations" appearing at the begin-  
ning of each regular issue of the PCT Gazette.

(54) Title: A FOLDING RELIEF MAP

(57) Abstract: A map or guide for a hilly or mountainous area, and a method of making wherein the topography of the selected area is represented graphically on at least one side of a foldable sheet (10), the sheet (10) having folds (11-15) (21-29) therein whereby the sheet (10) can be formed into a three dimensional shape representative of the topography of said area. Features represented graphically are arranged to be substantially coincident with a topographical feature, e.g. valley, ridge etc. formed in the three dimensional shaped sheet (10) by means of a plurality of major folds (11-15) intersected by a plurality of further folds (21-29), when the map is in a partially unfolded condition for reading.
